## **Environmental Quality Policy**

Dor Film sees the issue of environmental quality as paramount importance.

Dor Film acts to reduce activities that impact negatively on the environment and will allocate the resources needed to carry out and to improve the processes as necessary.

Dor Film acts to reduce electricity and water usage at the plant.

Dor Film acts to recycle and maximize the use of its waste, and acts to reduce waste at its source.

Dor Film undertakes to fulfil all the laws, regulations and binding orders in the area of environmental protection that are necessitated from the plant's area of operation.

Dor Film will act to train its employees according to an annual training program that will comprehend all the necessary professional and technological aspects, in order to generate involvement and responsibility of the employees, and in order to improve the impact of the plant's operations on the environment.
